

**Resources for Information  
on  
Harmful Ingredients /  
Chemicals in  
Personal Care and  
Household Products-  
Testimonies**

**Did you know that ....  
Your Personal Care Products and Household  
Cleaners May Affect the Health of Your Family!**

I really encourage everyone to do their research on the harmful products that we expose our family on a daily basis. Here is a list of resources that will help you get started

In 1997, in the Boston Globe, Senator Edward Kennedy reported that the GAC had reported and identified more than 125 known carcinogens in our daily used personal care products.

[Download](#) a short list of commonly used harmful ingredients in our personal care products, i.e. Toothpaste, mouthwash, lotions, cosmetics, shampoo, conditioners, shaving gel, deodorant, perfumes, fragrances, lipstick, lip balm, suntan lotion, sunscreens, soaps, bubble bath, powders with talc, etc.

Quote from Safe Shoppers Bible, (written by Dr. Samuel S. Epstein, M.D.)

"Not a single cosmetic company warns consumers of the presence of carcinogens in its products - despite the fact that several common cosmetic ingredients or their contaminants are carcinogenic themselves or are carcinogenic precursors. Consumers have an inalienable right to know what ingredients are in products they use daily, and to be certain that chemicals posing chronic health risks will be phased out when alternatives are available. I have reviewed the Neways products, and confirm their safety and absence of any carcinogenic ingredients or contaminants and deem them one of the safest personal care product lines in the world."

Samuel S. Epstein, MD, Professor emeritus, Environmental and Occupational Health, University of Illinois at Chicago, School of Public Health; and Chairman, [Cancer Prevention Coalition](#)

**They wouldn't sell it if it wasn't safe ....  
would they? [Did You Know?](#)**
